Herzlich Willkommen in der Welt von Xyloba!

Xyloba ist die Kugelbahn, die Musik macht. Das Stecksystem von Xyloba ermöglicht eine fast unbegrenzte Anzahl von verschiedenen Aufbauvarianten. Zusätzlich zum Bauspass kann mit Xyloba Musik komponiert werden. In den Bahnverlauf werden unterschiedlich hohe Klangplatten eingeschoben. Sie bestimmen die Melodie. Beim Heruntersausen prallt die Kugel an die einzeln befestigten Klangplatten. Unterschiedlich lange Schienen erzeugen den Rhythmus.

Für kleine und grosse Konstrukteure und Komponisten, die bereits erste Erfahrungen mit Xyloba gemacht haben, sind die Xyloba Melodienkästen *melodia* genau das Richtige. Damit lassen sich die Melodienanfänge bekannter Lieder aufbauen und abspielen - musikalischer Bauspass für die ganze Familie.

Lust auf „mehr“?

Die Melodienanfänge lassen sich ganz leicht komplettieren. Unter www.xyloba.ch/de/xylocalc gibt es auf Knopfdruck die Liste der benötigten Bauteile.

Welcome to the world of Xyloba!

Xyloba is the marble run that makes music. The simple interlocking Xyloba system allows an almost unlimited number of variations. The fun really begins when, in addition to building, one starts composing. Carrillon notes of various pitches can be built into the marble run. Tracks of different lengths correspond to note lengths: minims, crotchets and quavers. Melodies are composed by arranging the way the marbles hit these metal sound modules.

For big and small builders and composers who have already taken their first steps with Xyloba, the Xyloba *melodia* melody boxes fit the bill exactly. They can be set up to play the first lines of a variety of familiar songs - Musical building fun for all the family.
